## Rain covers for Broadcast cameras

CA\$15 / week

The Porta Brace RS-25P Rain Slicker is designed to protect for Panasonic AG-HPX300, HPX370, PX380, PX800 cameras from rain, dirt and dust while in operation.

Zippers, flaps, Touch Fastener, and vinyl windows allow you to reach critical controls, view meters and read-outs. The Rain Slicker is easy to put over the camera, mic, windscreen, batteries and pistol grip. A Rain Fly covers the entire top of the camera to seal handle opening.

The Rain Slicker fabric is constructed of laminations of water repellent nylon, a waterproof film and a soft nylon interior protecting the camera. It is designed to work on a tripod as well as on your shoulder.

The vinyl windows keep dirt and moisture out but allow quick visual checks on important meters, indicator lights and switches.

The Main Body is a carefully crafted lamination of heavy weight, water proof fabric. The waterproof coating is protected by a soft layer of nylon tricot adding significantly to the durability of the coating.
