Vintage Ferno Ambulance Cot

Ferno Model 30-NM MRI Multi-Level Lift-In Cot

Features:

Ferno's Model 30 Multi-Level, Lift-in Cot served as the industry standard for many years and is still used by many ambulance companies and medical facilities

The Ferno Model 30 cot adjusts to six height levels, enabling patient transfer from most nursing home beds or hospital treatment tables

To operate the height adjustment mechanism, the EMTs must assume the patients weight prior to raising or lowering the cot-bed frame

Because the Model 30 must be lifted to be loaded into the vehicle, it can be used with ambulances that have various floor heights

The Model 30 cot will work well in station wagons, vans or modular ambulances

The telescoping head-end main frame section allows the Model 30 cot to be shortened for maneuverability around tight corners and spaces

The Model 30-NM is the Non-Magnetic version for medical treatment areas where the cot must be non-

magnetize

Specifications:

Max height, 32"

Min height 12"

Length, 78"

Width, 23"

Weight, 56 lbs

Number of positions, 6

Weight capacity 400 lbs
