Stelton Classic EM77 Vacuum Jug, 31cm, 1L - Black

Originally developed by Danish designer Erik Magnussen in 1977, the EM77 Granite Vacuum Jug is a useful and practical thermos-style jug that keeps hot beverages hot and cold drinks cold. Made with a plastic body and inner glass sleeve, Magnussen intentionally chose these materials to make his product long-lasting and affordable. With its rocker stopper that allows for an easy, one-handed pour, and additional screw cap that can be used to keep the jug sealed when on the go, the EM77 Vacuum Jug is a timeless design that continues to enhance everyday life.
