Panasonic PV-GS320 3 CCD Mini DV Camcorder - Circa 2007

- 10x Optical Zoom
- 3.1 Megapixel Pictures
- Color Viewfinder
- 2.7" LCD Screen
- SD/HC Memory Card Slot

The Panasonic PV-GS320 3 CCD Mini DV Camcorder comes with a variety of features, including a three CCD image sensor, 10x optical zoom, 16:9 wide-screen capabilities, optical image stabilization, and a SD/HC card slot. This camcorder also features a 3.1 Megapixel still camera mode as well as a 2.7-Inch LCD.

It has an advanced 3 CCD system that uses three distinct CCD for processing, so that there is absolutely no light loss. This results in beautifully rendered images with vivid color, fine detail, and rich gradation. It features an O.I.S. (Optic Image Stabilizer) that minimizes the hand-shake that can be quite a problem with handheld shots. With O.I.S. and MEGA O.I.S., the camcorder is equipped for clear, beautiful shooting of both motion and still pictures. This camcorder features the multicoated Leica Dicomar lens that is able to suppress

diffused reflection.

The PV-GS320 has Simultaneous motion video and 1.2 Megapixel still picture recording. This two-in-one capability means that you can catch sudden photo opportunities without interrupting a great motion picture scene. Using the Tele-macro you can zoom at full magnification; you can shoot macro close-ups while maintaining a distance of 60 cm from your subject.
