Senecio peregrinus - 'string of dolphins'

Contact for pricing

IDEAL LIGHT: Direct sunlight; String of dolphins needs some direct sunlight to grow it's best, but they do appreciate a break from the harsh afternoon sun GA summers can bring. **WINTER HARDINESS:** Not cold hardy **WATER NEEDS:** Water when soil is dry. Do not let these succulents stay dry for too long. It's important to let the soil dry out, but they don't want to wait for days on end to quench their thirst. If they get too thirsty, they will draw water from their "dolphins" and they will begin to shrivel.
