Rhipsalis 'baccifera' - Mistletoe cactus - 6" hanging basket

Contact for pricing

IDEAL LIGHT: Partial sun to shade

WINTER HARDINESS: Not cold hardy

WATER NEEDS: Rhipsalis needs more water than your typical cactus. Feel the soil several times throughout the week, and water as soon as the soil dries out. During warm months, this could be every few days or once a week, so make sure to check soil often for moisture levels.

More info: This is not a typical cactus. In its native habitat, this epiphyte attaches their roots to tree bark & grows under the tree canopy in rainforests. Soil should be well draining and contain some bark.
