Traffic Control Cabinet With Faux Concrete Base

Contact for pricing

This traffic control relay box cabinet, set on a faux concrete base, features a weathered metallic exterior with stenciled "LETR #312" and other markings. Inside, it has wiring and components, making it an excellent prop for industrial or urban-themed movie and TV sets. With visible signs of wear, this cabinet adds a touch of realism to scenes involving old infrastructure, traffic control systems, or public utilities.
