Schwinn Cycle Truck Bicycle

Contact for pricing

Fully Functional Light and Horn. Takes 2 "D" Cell Batteries.

The Schwinn Cycle Truck bicycle, introduced in the 1930s, is designed for heavy-duty use with a sturdy frame and large front cargo basket. This bike was commonly used for deliveries and heavy hauling due to its reinforced construction and durable components. It features a front basket mounted low for stability, a rear cargo rack, and often includes a horn and a headlight. This model is perfect for movie or TV sets depicting mid-20th-century urban or industrial settings, adding authenticity to scenes involving deliveries or heavy cargo transport.
