10K Fresnel

Contact for pricing

This 10K Mole Richardson Fresnel may look like it's ready to bake your actors alive, but we've modified it for modern use. The original bates connector plug's been swapped for an Edison, and it comes with a standard household bulb adapter so you can light it up without a generator, a fireproof suit, or a prayer to OSHA. All the vintage glow, none of the blistering heat.

from [Fennick Studio Props](#) in Passaic, NJ
