Simms-Watts 100 MKII Tube Amplifier

Contact for pricing

Functional

This Simms-Watts 100 MKII is a vintage British tube amplifier head from the early 1970s, renowned for its robust 100-watt output and warm, clean tones. Paired with its matching speaker cabinet, this amplifier delivers a powerful and authentic sound, making it ideal for film or television sets depicting classic rock performances, recording studios, or rehearsal spaces. Its distinctive design and historical significance add authenticity to any production set in the 1970s or 1980s music scene.
