Simms-Watts 100 Speaker

Contact for pricing

Functional

The Simms-Watts 100 speaker cabinet, known for its robust construction and classic design, is a powerhouse of vintage sound amplification. Popular during the late 1960s and 1970s, this model became a staple for rock and blues musicians who valued its clear projection and durability. Its retro aesthetic and distinctive blue grill cloth make it an excellent addition to sets evoking vintage music scenes or recording studios.
