Shure 558SDX Microphone

Contact for pricing

The Shure 558SDX microphone is a vintage dynamic microphone that features a classic design and a durable build. Its on/off switch and cardioid pattern make it suitable for speech and vocal applications, often seen in settings like public addresses or live performances. Given its retro appearance, this microphone would be ideal for movie or TV sets depicting live concerts, interviews, or press events from the 1970s to 1980s, adding authenticity to any period scene.
