Boeing 737 Classic Passenger Service Unit

Contact for pricing

This PSU is in good condition. It was removed from a Boeing 737 Classic aircraft. This style of PSU was originally designed as part of the Boeing 757 Advanced Technologies Interior, that was later adapted onto the Boeing 737 Classics during the early to mid 1980s. It was even installed on some of the last Boeing 737-200s built.
