Philips LDK-10 Studio Broadcast Cameras, Studio Cameras

Contact for pricing

These were introduced 1994 and in-use through the 2000s. ALL THREE have working red tally lights. We also have one or two that are practical and working. You can see the target image on the view-finder. The output is an SD format. It has a triax connector, and I believe it also has a coax SD output. We also have a slightly shorter LDK-9 which looks VERY similar but it's slightly shorter.
