Vintage Computer 1980s-1990s. This computer terminal can display a screen that can be filmed for playback. But it cannot display Windows based screens. In other words, you cannot make your own graphics. It only text based screens because it is an older computer terminal. It has a serial RS232 connection only (not VGA). But it is genuine, it looks great on screen, and we have 40 matching computers! Reserve yours today! Or call if you have questions 404-349-7600
