## Airplane Set, Airplane Movie Set, Airplane Film Set

### Contact for pricing

This is a full-size Airplane Set. It is 40-foot-long 757 Airplane Film Set for filming. It is made from a real Airplane. It is located in our building, along with many other movie sets in our content studio. It is set-up and ready to film! Everything is real: seats, walls, working overhead baggage compartments, windows, shades, everything. The PSU's (passenger service units) are real. If you need an Oxygen mask drop, we can do it for an add'l charge with the help of an FX tech. We made this airplane specifically for filming.

The lighting is adjustable DMX LED lighting, both daylight and tungsten. There are 5 zones of controllable lighting. You can rent our Lighting Board to control the lighting, or rent our wireless DMX controller (or bring your own lighting board). If you don't know how to run a lighting board, we can keep it set to the normal preset which looks exactly like a real airplane.

Beverage carts and food carts are available. At the front of the plane there is a faux galley area, faux bathroom door, an entrance boarding area, and a cockpit door. At the rear of the airplane there is a curtain entrance at the rear entrance.

Seating is not bolted down, so you can move seating out of the way to create an area for cameras, lights, sound, etc. We normally provide it with 24 seats, with 2 seats on each side.

For an add'l charge we can give you a 3-2 seating

configuration (3 on the left, 2 on the right) giving you 30 seats for a wide plane look. For a First Class look, we can swap the business class seating for first-class seating for an add'l charge. Or lastly, we can give you two rows of first class seats, with regular seating behind it. Or we can swap out the entire section for first-class seating.

This is a beautiful Airplane Set. This is designed as an Airplane for Filming. This Airplane Movie Set is ideal for feature films, television shows, commercials, music videos, and photoshoots.
